California Emission Extended Defects Warranty					
Corrosion Limited Warranty	Not Applicable on Carrera Cup Vehicles				

Porsche Cars North America, Inc. is the sole importer and distributor of Porsche vehicles in the United States and offers these warranties on U.S. model vehicles only.

New Car Limited Warranty: 2 Years, unlimited mileage— Porsche remains one of the few automakers with an unlimited-mileage New Car Limited Warranty. Beginning on the date your car is first put into service, this warranty covers all factory-installed parts under normal use. Both parts and labor are covered. Porsche is unique in that tires are even covered, prorated based on tread depth and credited toward another purchase. Expendable maintenance items, normal wear and tear, and road hazards on tires are not covered (see the detailed description under "New Car Limited Warranty" for what is and is not covered, how to get warranty service, your responsibilities, etc.).

Paint Limited Warranty: 3 years, unlimited miles. The Porsche factory goes to great lengths to ensure a superb finish on every car that carries the famous Porsche crest. Should a flaw develop in the finish of your Porsche automobile, it may be covered under this warranty (see specific details under "Paint Limited Warranty").

Corrosion Limited Warranty: 10 years, unlimited mileage. Porsche's durability, long life and value have always been designed into every car. Through research and development into "long life" cars, Porsche has now extended this warranty to the first 6-year

corrosion perforation warranty on a production car for the 1980 model year. In 1986 this protection was increased to ten full years. At the time of printing, Porsche remains one of only two manufacturers offering this warranty, which carries important inherent long-term safety, appearance and handling benefits.

Federal Emission Controls Defect Warranty: 5 years, 50,000 miles. This warranty, which is in addition to the Porsche New Car Limited Warranty described above, certifies (1) that your Porsche was designed, built and equipped to conform to all U.S. emission standards applicable at the time of manufacture, and (2) that it is free from defects in materials and workmanship that would cause it not to meet those standards (see specific details under "Federal Emission Controls Defect Warranty").

Federal Emission Controls Performance Warranty: 5 years, 50,000 miles. This warranty essentially states that if you maintain, care for and use your Porsche vehicle as described in this booklet, the Maintenance Booklet and in the Owner's Manual and it should fail an EPA-approved emission test, Porsche Cars N.A. will, in the first 2 years or 24,000 miles, cover the cost of making all necessary adjustments, repairs and replacements necessary for the vehicle to pass the test;

Not Applicable on Carrera Cup Vehicles
